## PROFESSIONAL SUMMARY

Hands-on experience in Python and FastAPI with a strong focus on software development, backend engineering, and API architecture. Skilled in designing REST APIs and building scalable backend applications using modern development practices and tools. Focused on developing reliable, efficient software solutions while growing expertise in backend architecture and software engineering.

## SKILLS

- **Programming Languages:** Python, Java, SQL (Aggregations, Query Optimization)
- **Backend & APIs:** FastAPI, REST API Design & Development, Endpoint Development & Debugging, Request/Response Validation, JWT Authentication, OAuth2PasswordBearer, SQLAlchemy, Pydantic
- **Databases:** MySQL, PostgreSQL, Relational Databases
- **Tools & Frameworks:** Git, Docker, Postman, Swagger UI / OpenAPI, Pandas, Selenium, HTML/CSS (Basic)
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Complexity Analysis, System Design Basics, Distributed Systems (Working Knowledge)

## EXPERIENCE

**Python Developer Intern (On-site) — LITZ Tech, Coimbatore** Jun 2025 – Jul 2025

- Developed, tested, and debugged REST API endpoints in a production Python backend, validating request and response handling across core application workflows.
- Diagnosed and fixed functional bugs affecting real-time project workflows, improving overall system reliability and reducing recurring issues.
- Collaborated with a 5-engineer development team using Git for version control and coordinated delivery.

## PROJECTS

**Automated Test Metrics Analyzer — Python, FastAPI, Pandas, Selenium** Feb 2026 – Mar 2026

- Designed and built a Python/FastAPI backend service that ingests Selenium-generated test-result data and exposes QA metrics through REST API endpoints.
- Implemented endpoint routing, request validation, and structured JSON responses for computed test metrics.
- Automated metric computation using rule-based logic in Pandas, replacing manual QA review and cutting review effort.

**Agri Scan AI — Python, TensorFlow, CNN, EfficientNetB0** Jul 2025 – Oct 2025

- Built and trained a CNN-based image classification model using Python, TensorFlow, and EfficientNetB0, achieving 92% classification accuracy across multiple crop types.
- Developed an AI-driven crop disease detection system identifying infected leaves early for timely intervention.

**Leave Mate — Python, MySQL** Nov 2024 – Jan 2025

- Built a Python and MySQL backend implementing CRUD-based data handling for a multi-level leave management system.
- Implemented a multi-step faculty approval workflow with role-based functionality and real-time approval tracking for students and faculty.

## EDUCATION

**Dr. Mahalingam College of Engineering and Technology, Tamil Nadu, India** Sep 2023 – Jun 2027

B.Tech in Artificial Intelligence and Data Science — CGPA: 8.05

**Sri Lathangi Vidhya Mandhir Higher Secondary School, Tamil Nadu, India** Apr 2022 – Apr 2023

Higher Secondary — Percentage: 86.33

## ACHIEVEMENTS

- Secured a Top-150 rank (All India) in the Amazon ML Challenge 2025.
- Solved 300+ problems on LeetCode, strengthening algorithmic and problem-solving skills.
- Earned a 100-Day Coding Streak Badge on LeetCode for consistent daily practice.

## CERTIFICATIONS

- HackerRank REST API Certification; HackerRank Python (Basic) Certification; Hands-on Training in Generative AI Model Deployment — AI for Students Initiative.

## BEYOND ACADEMICS

- Class Representative; Vice President, FACArtClub — led faculty-student coordination and campus creative events.
