PROFESSIONAL SUMMARY

Software engineer working in Python and FastAPI with a focus on REST APIs and backend development using relational databases. Developed and debugged endpoints on a production backend and in several independent projects covering API design, database-driven applications. Handles the backend end-to-end — schema design, endpoint logic, and testing

SKILLS

- **Programming Languages:** Python, Java, SQL
- **Backend & APIs:** FastAPI, REST API Design & Development, Endpoint Development & Debugging, Request/Response Validation, JWT Authentication, OAuth2PasswordBearer, SQLAlchemy, Pydantic
- **Databases:** MySQL, PostgreSQL, Relational Databases
- **Tools & Frameworks:** Git, Docker, Postman, Swagger UI / OpenAPI, Pandas, Selenium, Pytest, HTML/CSS (Basic)
- **Computer Science Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Operating Systems, Complexity Analysis, System Design Basics

EXPERIENCE

Python Developer Intern (On-site) — LITZ Tech, Coimbatore

Jun 2025 - Jul 2025

- Developed and debugged REST API endpoints in a production Python backend, validating request and response handling across core application workflows using FastAPI and PostgreSQL
- Identified and corrected bugs in the real-time project workflows by addressing the root cause of the issues
- Collaborated with a development team consisting of five engineers, using Git for version control

PROJECTS

Automated Test Metrics Analyzer — Python, FastAPI, Pandas, Selenium

- Designed a Python/FastAPI backend service which takes in data generated by Selenium for test results and provides QA metrics via REST API endpoints
- Carried out endpoint routing, validated requests, and established structured JSON responses for the computed test metrics
- Substituted the manual QA review with the calculation of a rule-based metric using Pandas

Agri Scan AI — Python, TensorFlow, CNN, EfficientNetB0

- Trained an image classification model based on a CNN using Python, TensorFlow and EfficientNetB0, and reached a classification accuracy of 98% across multiple crop types
- Developed a image-classification pipeline for detecting crop diseases that identifies infected leaves earlier using leaf images

Leave Mate — Python, MySQL

- Created a backend using Python and MySQL with CRUD APIs for a leave management system
- Introduced a multi-step faculty approval workflow with real-time status tracking for both students and faculty

EDUCATION

Dr. Mahalingam College of Engineering and Technology, Tamil Nadu

Sep 2023 – Jun 2027 (Expected)

Bachelor of Technology in Artificial Intelligence and Data Science — CGPA: 8.1/10

Sri Lathangi Vidhya Mandhir Higher Secondary School, Tamil Nadu

Apr 2022 – Apr 2023

Higher Secondary – Percentage: 86.33

ACHIEVEMENTS

- Secured a Top 150 rank (All India) in the Amazon ML Challenge 2025
- Solved over 300 problems on LeetCode, strengthening algorithmic and problem-solving skills
- Earned a 100-Day Coding Streak Badge on LeetCode for consistent daily practice

CERTIFICATIONS

- HackerRank Certified in Python (Basic)
- HackerRank REST API and MySQL (Intermediate) Certifications
- Hands-on Training in Generative AI Model Deployment — AI for Students Initiative

BEYOND ACADEMICS

- Class Representative and Vice President of the FAC Art Club, in charge of coordinating activities between faculty and students as well as organizing campus creative events
